Maize have strategic role in feed industry. This paper aimed to analysis highlight and the role of important issues in maize supply chain which affected competitiveness of fee industry. We conduct a survey method. A framework Food Supply Chain Network (FSCN) was used to analysis the supply chain. Result of this paper are *firstly* : there are 3 structure of maize feed supply chain; *second* : farmers, village collectors, middleman, wholesaler, feed processor and poultry farmer were the primary member of the supply chain. Secondary member were seed producers, suppliers of farm equipment and transportation providers; *third* : maize supply chain face any threats especially at farm level. We highlight are several issue in the supply chain, there are: low of productivity, low of product quality, and limited processing facilities can be threat competitiveness of feed industry.

Maize supply, Food Supply Chain Network.
