Submission 43	
Title:	Properties of Bitumen Containing Powdered Gondorukem Rubber Additives
Paper:	 (Jun 30, 04:16 GMT)
Author keywords:	Gondorukem Penetration Softening Point Penetration Index Viscosity Stiffness
Topics:	Environmental Engineering Materials
Abstract:	The objective of the research is to determine the stiffness of bitumen with Gondorukem additives that form a new binder for pavement construction. The binders were subjected to conventional tests including penetration, softening point to determine the penetration Index. The stiffness of binder is determined by means of Van der Poel Nomograph. A new modified binder with Gondorukem additives improved the conventional properties of the base bitumen such as; penetration, softening point, temperature susceptibility. Moreover, the optimum percentage of modified binder Gondorukem in Bitumen (G/B) is achieved at 7% G/B.

Dear Elsa Eka,

Greetings..

Apologies for inconvenience in submission of revised paper in .doc format. Now I have changed the settings for submission of paper in .doc format through easychair.

I would like to request you all to submit the paper once again in .doc format through easycahir on or before 5th July, 2016.

Thank you for your continuous support.

Regards,  
Dr. Raju Aedla  
Organizing Chair 3rd ICEE 2016

Dear Corresponding Author,

Greetings from Dr. Raju Aedla, Editor of IJEE and Organizing Secretary- 3rd ICEE 2016.

First of all, I would like to thank for your valuable research contribution in 3rd International Conference on Earth Sciences and Engineering (3rd ICEE 2016), held during 17th -18th June, 2016 jointly-organized by Department of Civil Engineering, Nehru Institute of Technology, Coimbatore, Tamilnadu and Cafet-Innova Technical Society, Hyderabad, India.

Find attached final copy and index of your paper published in "International Journal of Earth Sciences and Engineering (IJEE)".

The papers will be uploaded in the conference website at <http://icee.cafetinnova.org/>
