

1st INTERNATIONAL CONFERENCE & SYMPOSIUM ON CONSTRUCTION INDUSTRY DEVELOPMENT (i-CENTROID2021)

24-25 AUGUST 2021,
ONLINE FROM
UNIVERSITAS ANDALAS, INDONESIA

Globally, the construction industry is facing many challenges of providing values to be added in the demanding building and infrastructure provision for all societies. Construction industry is part of the economy which plans, finances, designs, constructs, operates and eventually, demolishes buildings and works and disposes of the debris. Construction industry development is a deliberate and managed process to improve the capacity and effectiveness of the construction industry to meet the national economic demand for building and civil engineering products, and to support sustained national economic and social development objectives. Therefore, there is a need of cross-discipline and cross-stakeholders in the industry to address strategic efforts to create value added construction.

"Value Added Construction"

THE THEME. The 1st I-CENTROID2021 will address **Values Added Construction** under following sub-themes:

- Material, Engineering & Technology Development in the Construction Industry
- Human Capital, Corporate & Business Development in the Construction Industry
