is expanded

Increasing number of teenager who uses SNS  
(75.5%, Internet user penetration in teenage population)

Positive Consequences:

- Facilitating Information(Aquisition & Exploration)
- Expanding connexion
- Broaden the horizon of knowledge
- Increasing mobility

**misused**

Negative Consequences:

- Harmful & Disadvantage : Spreading pornography content
- Changes pattern romantic relationship
- High risk for adolescent make a relationship with people who have bad intention

# Introduction

- Exposure early pornography → high risk to become sexual offender
- Family dysfunctioning → High risk juvenile sexual offender

Parenting task become more challenging so they must have competences, especially parenting self-efficacy

# Research Methodology

- qualitative research design
- Phenomenology method
- In depth interview and observation

# Result and Discussion

- Parenting self-efficacy among the mothers of juvenile sexual offenders are described from 5 parenting domains such as : Academic/Achievement, Discipline, Health, Nurturance, Recreation
- In general, mothers showed their uncertainty in carrying out the parenting of the five domains
- 2 of 5 domain still feel efficacious but not fully belief such : Health and recreation domain. But, the others domain mothers feel incompetence, feeling hopelessness and questioning their parenting competence

# Conclusion

- Parenting self-efficacy has important role of parents to carry out parenting task, especially for mother
- Mother of juvenile sexual offender showed low parenting self efficacy
- So, based on this research providing for intervention for the parents as important as giving the treatment for juvenile sexual offender
