To: Daimon Syukri <dsyukri@ae.unand.ac.id>

Dear Dr. Syukri,

Congratulations, the manuscript titled "Utilization of nanocellulose biofilter from pineapple peel waste to remove microbial waste in water" has been successfully submitted to Journal of Environmental and Public Health.

We will confirm this submission with all authors of the manuscript, but you will be the primary recipient of communications from the journal. As submitting author, you will be responsible for responding to editorial queries and making updates to the manuscript.

In order to view the status of the manuscript, please visit the manuscript details page.

Thank you for submitting your work to Journal of Environmental and Public Health.

Dear Dr. Syukri,

In order for your submission "Utilization of nanocellulose biofilter from pineapple peel waste to remove microbial waste in water" to Journal of Environmental and Public Health to proceed to the review process, there needs to be a revision.

Reason & Details:

“

Reviewer 2“Utilization of nanocellulose biofilter from pineapple peel waste to remove microbial waste in water” This manuscript mainly investigated the fabrication of three types of the nanocellulose biofilter to filter microbes in the water. The manuscript needs major improvement by addressing the following points: - The Abstract should be rewritten clearly with more details. - The manuscript must be checked again for some grammatical errors. There are many syntax errors. - The quality of figures should be improved. Please replace all the images with high-quality figures. - The reviewer suggests to the author to expand the introduction by considering the following papers, in order to introduce the usage of various nanoparticles: <https://doi.org/10.1016/j.ijbiomac.2022.01.084>
<https://doi.org/10.1177/00219983211031644>
<https://doi.org/10.1177/07316844221102945>
<http://dx.doi.org/10.22068/ijmse.1985> - The methodology should be defined clearly in the introduction section. - The preparation process of the nanocellulose biofilter needs to clarify more clearly. Maybe, the addition of a fabrication schematic is a good idea. - The results seems to be insufficient to support the claimed statement by the authors “when applied to water polluting bacteria E.Coli, the all prepared NCBs were able to reduce it by more than 90%.The effectiveness of NCB to remove microbial contamination, especially bacteria, looks very promising with or without TiO2 and graphene reinforcement treatment.” The above points need to be address completely to have a reasonably good quality manuscript. As a conclusion. the manuscript will be reviewed once again after applying

above modifications. Reviewer 1 Thank you for sending the article on Utilization of nanocellulose biofilter from pineapple peel waste to remove microbial waste in *Journal of Environmental and Public Health*. Kind regards, Amirul Khandan

MANUSCRIPT DETAILS

ntal revision. The following should a) clear and general, and its connection with the magazine is not clear. - What is the reason for using pineapple waste with high humidity? - How does the waste removal process happen? - Please rewrite the introduction. - The language level of the article is weak. - The research materials and methods are not clear. - References from magazines and similar articles should be provided.

Your manuscript has been accepted for publication

Journal of Environmental and Public Health <subha.easwaran@hindawi.com>

Fri 12/30/2022 4:25 PM

To: Daimon Syukri <dsyukri@ae.unand.ac.id>

Dear Dr. Syukri,

I am delighted to inform you that the review of your Research Article 5823207 titled Application of nanocellulose biofilter from pineapple peel waste for water's microbes removal has been completed and your article has been accepted for publication in Journal of Environmental and Public Health.

Please visit the manuscript details page to review the editorial notes and any comments from external reviewers. If you have deposited your manuscript on a preprint server, now would be a good time to update it with the accepted version. If you have not deposited your manuscript on a preprint server, you are free to do so.

We will now check that all of your files are complete before passing them over to our production team for processing. We will let you know soon should we require any further information.

As an open access journal, publication of articles in Journal of Environmental and Public Health are associated with Article Processing Charges. If applicable, you will receive a separate communication from our Editorial office in relation to this shortly. In regards to payments, we will:

- **Only ever contact you from @hindawi.com email addresses.** If you receive communications that claim to be from us, or one of our journals, but do not come from an @hindawi.com email address, please contact us directly at help@hindawi.com
- **Only ever request payment through our own invoicing system.** Any email requesting payment will always be from an @hindawi.com email address and will always direct you to our invoicing system with a link beginning <https://invoicing.hindawi.com>

If you receive payment requests or information in ways other than this, or have any questions about Article Processing Charges, please contact us at help@hindawi.com.

Finally, we have partnered with leading author service providers to offer our authors discounts on a wide range of post-publication services (including videos, posters and more) to help you enhance the visibility and impact of your academic paper. Please [visit our author services page to learn more](#).

Thank you for choosing to publish with Journal of Environmental and Public Health.
