The background of the entire page is a dark purple color. It is decorated with numerous triangles of various sizes and orientations in a lighter, reddish-purple hue. These triangles are scattered across the page, creating a dynamic, abstract geometric pattern. Some triangles are large and prominent, while others are small and subtle. The overall effect is modern and artistic.

BACKGROUND

Occupational Health and Safety Management System (OHSMS) is part of management system of company, overall as risk control for make a safety workplace, efficient and productive. Cases of occupational Accidents are still found in PT. Tirta Investama Solok as many as 4 cases in 2016.

CONCLUSION

Application of occupational health and safety (OHS) in PT. Tirta Investama Solok has been running well, but, it still needed the fulfill government's rule about application of OHSMS, Adding case of Personal Protective Equipment and obeying HSE rule for the good application of OHS in factory.

OBJECTIVE

The purpose of this research is to know analysis of application OHS in PT. Tirta Investama Solok at year 2017.

ACKNOWLEDGMENTS

The writer feel grateful to Allah, Who gave the opportunity to me for studying in Public Health Department, Andalas University. This study is part of my undergraduate thesis. Thank you for Dean, lecturers and all of academic staff Public Health Department, Andalas University. Thank you for management of PT. Tirta Investama Solok who participated and helped my study.

METHODOLOGY

This study is qualitative study. This study take place in December 2016 until March 2017. Determination technique Informant use purposive sampling. Collecting data with indepth interview, observation and quisioner. Data processing by reducing the data, presentation of data, drawing conclusions, and data analysis did by triangulation of sources and methods.

RESULTS

Based on the results of study, author get the information that adding case of Personal Protective Equipment (PPE). In other while for process side, that relating about commitment and policy has not yet according to government's rule about application of OHSMS, program planning has already well done, implementation of HSE has still found workers who don't use Personal Protective Equipment, HSE monitoring, reviewing and improving have already well done. The output is pre OHSMS in factory has applied well.
